Allowable Subject Matter

3. Claims 3-4, 6-12 and 14-49 are allowed.
4. The following is an examiner's statement of reasons for allowance:
 - a. Regarding claims 3, 9-12 and 14-17, a search of the prior art does not disclose or reasonably suggest at least three terminals comprising a gate electrode, a source electrode and a drain electrode; and an insulating layer and an organic semiconductor layer on a substrate, which controls an electric current flowing between the source electrode and the drain electrode by applying an electric voltage across the gate electrode, a distance between the source electrode and the drain electrode being 1 μm to 1 mm, with the organic semiconductor comprising a heterocyclic compound containing a nitrogen atom of Formula (II), in the context of the entire claim.
 - b. Regarding claims 4 and 18-25, a search of the prior art does not disclose or reasonably suggest at least three terminals comprising a gate electrode, a source electrode and a drain electrode; and an insulating layer and an organic

semiconductor layer on a substrate, which controls an electric current flowing between the source electrode and the drain electrode by applying an electric voltage across the gate electrode, a distance between the source electrode and the drain electrode being 1 μm to 1 mm, with the organic semiconductor comprising a heterocyclic compound containing a nitrogen atom of Formula (III), in the context of the entire claim.

- c. Regarding claims 6 and 26-33, a search of the prior art does not disclose or reasonably suggest at least three terminals comprising a gate electrode, a source electrode and a drain electrode; and an insulating layer and an organic semiconductor layer on a substrate, which controls an electric current flowing between the source electrode and the drain electrode by applying an electric voltage across the gate electrode, a distance between the source electrode and the drain electrode being 1 μm to 1 mm, with the organic semiconductor comprising a heterocyclic compound containing a nitrogen atom of Formula (V), in the context of the entire claim.
- d. Regarding claims 7 and 34-41, a search of the prior art does not disclose or reasonably suggest at least three terminals comprising a gate electrode, a source electrode and a drain electrode; and an insulating layer and an organic semiconductor layer on a substrate, which controls an electric current flowing between the source electrode and the drain electrode by applying an electric voltage across the gate electrode, a distance between the source electrode and the drain electrode being 1 μm to 1 mm, with the organic semiconductor comprising a

Art Unit: 2891

heterocyclic compound containing a nitrogen atom of Formula (VI), in the context of the entire claim.

- e. Regarding claims 8 and 42-49, a search of the prior art does not disclose or reasonably suggest at least three terminals comprising a gate electrode, a source electrode and a drain electrode; and an insulating layer and an organic semiconductor layer on a substrate, which controls an electric current flowing between the source electrode and the drain electrode by applying an electric voltage across the gate electrode, a distance between the source electrode and the drain electrode being 1 μm to 1 mm, with the organic semiconductor comprising a heterocyclic compound containing a nitrogen atom of Formula (VII), in the context of the entire claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
